

TECHNICAL EVENT – BUG BOUNTY

RULES AND REGULATIONS FOR THE EVENT

Debugging is a programming event, which finds and resolves defects or problems within a computer program that prevent correct operation of computer software or a system.

- All Participants are expected to abide by the rules & regulations of the contest.
- Do not discuss any strategy or logic of the program during a live contest.
- Any Violation of the Rules & Regulations shall lead to the cancellation of the candidature from the competition.
- In case of any conflict, the decision of jury panel will be final.

Round - 45 minutes

- A set of 7 questions will be given with some syntactical errors.
- Points will be awarded for debugging each error.
- Total points will be evaluated upon the correctness of the submitted program/programs.
- Duration of the round will be 15 minutes for first 5 questions.
